1.	Mining of iron ores	71	100
2.	Manufacture of basic iron and steel	241	
3.	Casting of metals	243	
4.	Manufacture of other fabricated metal products;	259	

- Number of locations where plants and/or operations/offices of the entity are situated**

Location	Number of plants	Number of offices	Total
National	3 (Integrated Steel Plants at Vijayanagar, Dolvi and Salem)	1 (Mumbai Office)	4
International	0	0	0

## 17. Markets served by the entity:

### a. Number of locations

Locations	Number
National (No. of States)	28
International (No. of Countries)	41

### b. What is the contribution of exports as a percentage of the total turnover of the entity?

9%

### c. A brief on types of customers

The steel produced finds applications in sectors like automobile, general engineering, machinery, projects, and construction, and our customers are spread across these sectors for the use of steel in various applications. More details on our products and their applications are available at: <https://www.jswsteel.in/products>.

Apart from the above, JSW Steel has supplied its Neosteel product to several noteworthy projects through retail distributors during the year, which have gone into applications like Infrastructure, Commercial, Residential, Religious, and educational centers.

24. Overview of the entity's material responsible business conduct issues

Please indicate material responsible business conduct and sustainability issues pertaining to environmental and social matters that present a risk or an opportunity to your business, rationale for identifying the same, approach to adapt or mitigate the risk along-with its financial implications, as per the following format:

S. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk / opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
1.	Air emission	R	A key parameter for measurement of our environmental performance. Our systems must be in place to maintain our emissions under statutory limits.	We are committed to preventing, abating and mitigating our emissions to air and have dedicated policies addressing point and non-point source emissions. Annual targets are created, and assessment is done monthly.	Negative Implication
2.	Biodiversity	R	We understand that preserving and restoring biodiversity is critical for maintaining a balanced ecosystem. We have signed up to commit to the IBBI initiative and continue our biennial disclosure under the 10 points prescribed by IBBI.	We strive to achieve 'No Net Loss' of biodiversity at all our operating sites by 2030. In compliance with the IBBI declaration, we have mapped the biodiversity interfaces with business operations designated as biodiversity champions. We have implemented schemes for enhancing awareness of biodiversity within the organisation.	Negative Implication
3.	Business ethics	O	We believe that a strong and fully embedded commitment to undertaking business ethically brings considerable benefits, including improved consumer perception (leading to increased loyalty), greater investment, reduced costs, and enhanced employee motivation, involvement and interaction.	Not Applicable	Positive Implication

S. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk / opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
4.	Climate change	R	Steel is hard to abate sector in the world, influencing steelmakers to pursue decarbonisation actively. With India's intended nationally determined contributions (INDCs), it has become crucial to proactively work on achieving the set targets in the climate change arena.	With the carbon footprint of the steel industry among the top in global emissions, a transition towards a carbon-neutral scenario requires set targets and strong actions. We have developed clear targets for decarbonisation, have a dedicated climate change policy, and instituted a Climate Action Group to drive the organisation's climate action agenda.	Negative Implication
5.	Corporate governance, transparency and disclosures	O	We believe that good governance provides strategic direction, evaluates overall performance & ensures the long-term interest of the stakeholders are being served.	Not Applicable	Positive Implication
6.	Cultural Heritage	O	Across the world, tangible and intangible forms of cultural heritage are under attack from various threats, including urban development, mineral and resource extraction, climate change, tourism, wars and natural disasters. It should be our aim to do what we can to help protect and enhance the unique cultural heritage of India, seeking to strengthen protection and improve recognition, understanding and promotion.	Not Applicable	Positive Implication
7.	Economic performance	O	Foresight in properly identifying and addressing the key demand dynamics in domestic and export markets aids in meeting operational guidance.	Not Applicable	Positive Implication
8.	Employee health, safety and well being	R	We aspire to achieve zero harm across all our operations. Health and Safety represent an important part of our group's values.	We are committed to providing a healthy and safe working environment for our employees, contractors, business associates, visitors on-premises, and above all, communities impacted by our operations. We have stringent safety systems in place to achieve our zero-harm vision. These processes are, to a large extent, tech-enabled and leverage real-time data, and are guided by the principle of shared responsibility. From a governance standpoint, our senior management, along with key plant personnel, assumes overall accountability for ensuring that the appropriate safety policies, procedures and safeguards are put into practice.	Negative Implication
9.	Energy	R	As global energy prices and demand continue to grow, it is essential to future-proof ourselves against the availability and affordability of sustainable energy to conduct our operations.	We have adopted state-of-the-art and energy-efficient systems and practices across our operations. This helps us continuously conserve resources and energy and, consequently, keep our input costs under control. Further, as part of our long-term plan, we are evaluating the building of adequate infrastructure to produce green electricity as a part of our overall energy portfolio. Our energy policy predominantly straddles efficient energy use, implementation of innovative projects to reduce energy demand and proactively embracing renewable energy (RE).	Negative Implication

S. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk / opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
10.	Human rights	R	We are cognisant of the fact that every individual brings a different and unique set of perspectives and capabilities to our team. We strongly advocate against all kinds of discrimination and stand with our team in the event of any violation.	We strive to involve all employees in upholding and sustaining the SA8000 policy in our operations. We are committed to ensuring a workplace adheres to international guidelines and conventions such as ILO. We are fully committed to employing people solely on the basis of their ability to do the job, prohibiting any discrimination based on race, colour, age, gender, sexual orientation, gender identity and expression, ethnicity, religion, disability, family status, social origin, and so on. We have also conducted Human Rights Due Diligence at our operations to understand the human rights issues present and take appropriate actions accordingly.	Negative Implication
11.	Local Considerations & Indigenous People	R	In the steelmaking industry, there is potential for the generation of noise, odours, smoke, fumes, dust etc., that can disturb the local communities in and around the plant premises. Lands of indigenous people have historically been routinely appropriated, sold, leased or simply plundered and polluted by governments and private companies. Indigenous People have been forced to leave their traditional lands, and this has resulted in marginalisation, poverty and disease; and, in some instances, the extinction of a people and the loss of their unique identities, customs and traditions.	We maintain an identification prevention-feedback-monitoring strategy to tackle these stakeholder-critical issues. CSR projects are planned in order to improve the livelihood of communities. We aim to gain a full and detailed understanding of where and how our current operations have interacted with communities, both now and in the past and for that, we undertake an assessment at our sites to identify any historical or current instances where our activities directly or indirectly impact upon communities.	Negative Implication
12.	Resources	R	With a burgeoning population and increasing urbanisation, demand for resources has significantly increased worldwide. The competition between industries and nations is expected to increase, and in this context, prudent sourcing, long-term raw material security and efficient utilisation assume priority.	We have institutionalised processes that maximise the utilisation of natural resources that we rely on. Our resource conservation policy is anchored on the considerate sourcing of materials, efficient use, and innovative projects to reduce the demand for raw materials.	Negative Implication
13.	Social Sustainability	O	We believe that community well-being is the outcome of collaborative developmental models that are replicable, scalable and sustainable.	Not Applicable	Positive Implication
14.	Supply chain sustainability	R	An integral part of the business is suppliers who contribute to growth and viability. This enables the whole business ecosystem to function with a sense of responsibility, integrity and overall compliance.	We have formulated a Supplier Code of Conduct that lays down norms of behaviour and practices for smoother and compliant conduct. The SCoC contains 5 key features that cover all dimensions of our value chain. We have initiated supplier's ESG assessment for our critical suppliers.	Negative Implication
15.	Sustainable Mining	R	Mining is a natural capital-intensive activity that poses significant environmental risks if not managed scientifically. Various aspects, such as tailings, energy and water consumption, biodiversity and structural stability, are some of the aspects that are considered critical in mining operations.	We adhere to the regulations as prescribed by the Government of India, along with our mine closure plans.	Negative Implication

S. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk / opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
16.	Technology, product and process innovation	O	We recognise that role of technology is crucial for decarbonisation of steel sector and we also believe that this will require fostering innovation at an early stage.	Not Applicable	Positive Implication
17.	Waste	R	Solid waste disposal and management pose significant challenges. Lack of proper treatment of waste causes several spillover effects, including organic decay of matter that contributes to GHG emissions and non-decay of single-use plastics that clog the natural ecosystem.	Circularity is a plausible solution, departing from the traditionally linear use-and-dispose paradigm. Hazardous and non-hazardous waste is formed in the steelmaking process are managed using an integrated strategy for efficient waste management, which takes into account environmental impact, social effects and commercial viability. We follow a widely accepted 'waste management hierarchy, which follows a 'prevent-reuse-recycle-dispose' value chain.	Negative Implication
18.	Wastewater	R	Industrial waste and effluents, along with domestic sewage, can threaten natural ecosystems and communities if disposed of without treatment. A significant need for the industry to consciously manage its effluents and restrict discharge into natural water bodies.	We uphold our Zero Liquid Discharge (ZLD) status across all our steel manufacturing locations. Following the ZLD process, we have achieved cost savings, mitigated water acquisition risks and achieved overall better environmental performance and compliance. Our onsite Sewage Treatment Plants (STPs) manage sewage for domestic use and direct the treated water towards operational purposes.	Negative Implication
19.	Water resources	O	The requirement for fresh water is rising across communities and industries, and there is a global focus on achieving water security. Innovative ways of sourcing and managing water are being sought across the board to manage persistent and long-term challenges.	Not Applicable	Positive Implication

<b>Governance, leadership and oversight</b>										
7.	Statement by director responsible for the business responsibility report, highlighting ESG related challenges, targets and achievements (listed entity has flexibility regarding the placement of this disclosure)	A shift towards more sustainable living is not only shaping new trends in consumer industries but also in areas such as steel. Today the variety of applications where steel is used necessitates producers to continuously improve quality and offer products with a lesser carbon footprint. JSW steel is at the forefront of both these trends. On one hand, we are investing heavily in R&D and increasing our downstream portfolio of sustainable products and on the other, we are doubling up on sustainability by controlling our emissions, improving resource consumption, making processes efficient, being energy-light and ensuring multi-pronged digital focus, helping us improve existing practices.

**Leadership Indicators**

**1. Provide the processes for consultation between stakeholders and the Board on economic, environmental, and social topics or if consultation is delegated, how is feedback from such consultations provided to the Board.**

Our current communications with the minority shareholders are mainly through the annual integrated reporting, web sites and AGM. We get engaged specifically with our investors through the rating agencies or investors directly through our investor relations department and have regular dialogue with them throughout the year either through phone calls or mail exchanges on our ESG performance and plans. We have not received any specific complaints on any aspect of NG RBC from our investors and lenders till date. Rather we have had very constructive discussions on the plans, performances and strategy. The dialogues with all the shareholders/stakeholders are on a regular basis by the Company. The AGM is held by the Company to solicit the views of all the shareholders of the Company. The shareholders are also empowered to lodge their grievances via a dedicated e-mail address, which are then resolved by the Company.

**2. Whether stakeholder consultation is used to support the identification and management of environmental, and social topics (Yes / No). If so, provide details of instances as to how the inputs received from stakeholders on these topics were incorporated into policies and activities of the entity.**

Understanding, identifying and prioritising issues that could significantly impact our value creation abilities is a key step in our strategy planning process. At JSW Steel, we undertook a formal materiality assessment exercise in FY 2018-19 and a benchmarked alignment in FY 2019-20. A fresh materiality assessment was executed during FY 2020-21 to explore the issues considered to be most relevant by our management and stakeholders, which were then factored into our strategic priorities. The stakeholder consultations and materiality assessment exercises have been instrumental in the identification of the 17 environmental, social and governance priorities at JSW Steel, and in maintaining a track on the key performance indicators under these priorities. In FY23, we have initialised double materiality assessment.

**3. Provide details of instances of engagement with, and actions taken to, address the concerns of vulnerable/ marginalised stakeholder groups.**

JSW has been working for education, health & nutrition, sanitation and wellbeing of marginalised sections of the society. To identify the vulnerable and marginalised stakeholders within the identified focus areas, several methodologies are adopted such as desk research for situational analysis, participatory rural appraisal, community need assessment and focus group discussion with the stakeholders. These methods help in prioritising the community level interventions. JSW Steel focuses on strengthening its relationships with the communities through a meaningful and purposeful engagement. It implements a range of programmes that enables improved quality of life for people who are impacted by its operations. Over the years, JSW Steel's continuous efforts have resulted in better education, better health, better employment, better infrastructure and better sanitation for the local communities. Overall, the Company has aligned its CSR programmes to the key areas of health and nutrition, education and learning, agri- initiatives, livelihood, sanitation, water conservation and augmentation, biodiversity promotion, skill enhancement, and art, culture and sports.

## PRINCIPLE 5: Businesses should respect and promote human rights

### Essential Indicators

#### 1. Employees and workers who have been provided training on human rights issues and policy(ies) of the entity, in the following format:

Majority of our employees are provided with human rights training. There is a policy on Human Rights of the Company available on intranet and website of the Company. For all new employees who are on boarded, Human Rights awareness is part of the induction session. For worker category, face to face/classroom session on the code of conduct is done which includes aspects of Human Rights. In FY23 we have completed HRDD for one of our major operations.

#### 2. Details of minimum wages paid to employees and workers, in the following format

As both Central and State Government have authorisation over fixing the wages, the State Governments fix their own scheduled employments and further release the rates of Minimum Wage along with the VDA (Variable Dearness Allowance). Wage boards are set up to review and fix minimum wages at specified intervals. The wage rates in scheduled employments differ across states, sectors, skills, regions and occupations owing to a lot of differentiating factors. Hence, there is no single uniform minimum wage rate across the country and the revision cycle differs for each state. However Minimum wages are paid and adhered to by the Company as per the applicable regulation.

**4. Do you have a focal point (Individual/ Committee) responsible for addressing human rights impacts or issues caused or contributed to by the business? (Yes/No)**

Yes. Human Rights is a sensitive issue and JSW Steel has zero tolerance to Human Rights violations. Human Rights is one of the 17 key focus areas for the Company. For any Human Rights violation, wherever reported shall be investigated by a special committee nominated for the purpose by the Senior Leadership.

**5. Describe the internal mechanisms in place to redress grievances related to human rights issues.**

At JSW, we have a moral obligation to do all that we can to actively involve ourselves in the protection and enhancement of human rights in areas that are within our direct control and to work with others to protect every individual's rights and freedom. We are fully committed to promoting inclusivity and equality, prohibiting any discrimination and safeguarding the human rights of all our teams.

We are cognisant of the fact that every individual brings a different and unique set of perspectives and capabilities to our team and, as such, JSW is fully committed to employing people solely on the basis of their ability to do the job, prohibiting any discrimination based on race, colour, age, gender, sexual orientation, gender identity and expression, ethnicity, religion, disability, family status, social origin and so on.

We believe that every human being has the right to equality and non-discrimination. We respect human rights and are committed to ensuring that they are protected, guided by our human rights policy. Our human rights policy articulates our stand on human rights, including non-discrimination, prohibition of child and forced labour, freedom of association and the right to engage in collective bargaining (further details can be found in our Business Responsibility Report published on our corporate website). We contribute to the fulfilment of human rights by complying with all national and local legislations, and international norms as applicable. This is enabled by our well-articulated policies, effective programmes and supporting grievance redressal mechanisms. No complaints related to child labour, forced labour, involuntary labour or discriminatory employment were received during the reporting year. We have formulated a policy to demonstrate our commitment to protecting and enhancing the human rights of individuals and promoting inclusivity, diversity and equality.

Stakeholder grievance mechanism: JSW Steel is committed to promoting responsible behaviour and value for social and environmental well-being. We have a policy on business conduct that is applicable to all our employees and value chain partners. We also have a structured stakeholder grievance redressal mechanism through which stakeholders freely share their concerns and grievances with the Company.

Whistleblower policy: We formulated the whistleblower policy / vigil mechanism in order to provide a mechanism for Directors and employees of JSW Steel to approach the Ethics Counsellor/Chairman of the Audit Committee of the Board to report genuine concerns about unethical behaviour, actual or suspected fraud or violation of the Code of Conduct or Ethics Policy, or any other unethical or improper activity.

**6. Number of Complaints on the following made by employees and workers:**

	FY 2022-23 (Current Financial Year)			FY 2021-22 (Previous Financial Year)		
	Filed during the year	Pending resolution at the end of year	Remarks	Filed during the year	Pending resolution at the end of year	Remarks

Other human rights related issues						

**7. Mechanisms to prevent adverse consequences to the complainant in discrimination and harassment cases**

The Company believes in promoting diversity & inclusion as a culture which allows all employees to bring their authentic selves to work and contribute wholly with their skills, experience and perspective for creating unmatched value for all stakeholders. It provides a rules-based policy framework that is non-discriminatory and provides equal opportunity for all individuals irrespective of their gender, religion, caste, race, age, community, physical ability or gender orientation. JSW endeavors to ensure a safe, secure and congenial work environment, so that employees can deliver their best without inhibition. The Company has put in place a robust Grievance Redressal process for investigation of employee concerns and has instituted a Code of Conduct & Employee Service Rules that clearly delineates employee responsibilities and acceptable employee conduct. Together, these constitute the foundation for promoting a diverse and inclusive culture at the workplace.

## 8. Do human rights requirements form part of your business agreements and contracts? (Yes/No)

Yes. The business agreements and contracts do include Company's expectations to promote sustainability, fair competition and respect for human rights.

At JSW Steel, suppliers are an integral part of our business, who contribute to our growth and viability as a business. We engage regularly with our suppliers to ensure that our overall ecosystem functions with a sense of responsibility, integrity and overall compliance. To achieve this, we have formulated a Supplier Code of Conduct (SCoC) that lays down norms of behaviour and practices for smoother and compliant conduct. This SCoC takes cognisance of the themes of human rights, labour, environment, and anti-corruption, as described in the United Nations Global Compact (UNGC). Principles and norms described under the theme of 'labour' are based on the standards specified by International Labour Organisation (ILO) from time-to-time.

We have developed vendor and supplier registration tool in which we have provided questionnaires so that every new supplier/distributor has to disclose the social and environment parameters such as licence to operate industrial H&S department, consent from the respective state pollution control boards, ISO certifications, etc.

The key principles of SCoC are –

1. Compliance Management
2. Environment
3. Human Rights
4. Labour
5. Business Ethics

The SCoC is available at <https://www.jsw.in/sites/default/files/assets/downloads/steel/IR/Corporate%20Governance/Code%20of%20Conduct/SUPPLIER%20CODE%20OF%20CONDUCT%2019%20Feb%202021.pdf>

## 10. Provide details of any corrective actions taken or underway to address significant risks / concerns arising from the assessments at Question 9 above

No complaints related to child labour, forced labour, involuntary labour, or discriminatory employment were received during the reporting year and none are pending at the end of the reporting year. JSW Steel is committed to promoting responsible behavior and value for social and environmental wellbeing. To this end, it has a policy on business conduct that is applicable to all its employees and value chain partners. It has a structured stakeholder grievance redressal mechanism through which stakeholders freely share their concerns and grievances with the Company, including regarding human rights issues. Company have stakeholder relationship committee to periodically look into the functioning of the Company's shareholder/ investor grievance redressal system and oversee improvements in the same, besides reporting serious concerns, if any. There were no grievances related to Human Rights received by the Company.

### Leadership Indicators

#### 1. Details of a business process being modified / introduced as a result of addressing human rights grievances/ complaints.

As there were no complaints in the FY23, no business process was modified/introduced due to this.

#### 2. Details of the scope and coverage of any Human rights due-diligence conducted.

We have carried out HRDD for one of our major operations in FY23

**7. Does the entity have any project related to reducing Green House Gas emission? If Yes, then provide details**

JSW Steel is at the front-runner in incorporating sustainability at the core of its operations and decision making. We have set ourselves an ambitious CO<sub>2</sub> emission reduction target of 42% reduction over a base year of 2005 till 2030. This will bring down the CO<sub>2</sub> levels below 1.95 tCO<sub>2</sub>/tcs. This target is aligned with the global sustainable development scenario (SDS) pathway.

- We have adopted the Best Available Technologies (BAT) to improve the of our operations on climate.
- Our roadmap to 2030 includes -
  - ▶ Focus on Energy and Process Efficiency
  - ▶ Energy Transition for De-carbonisation
  - ▶ Improving the raw material quality
  - ▶ Material circularity through increase usage of scrap
  - ▶ Alternative fuel sources
- We are operating a CCU of 100TPD capacity where CO<sub>2</sub> is captured and refined for use in the food & beverage industry. The adoption of this technology at a very early stage gives us a head-start in our plans to scale up the utility of CCUS in conjunction with BF-BOF in operations.
- We are also operating an EAF wherein waste plastic is injected. This has helped reduce GHG and also plastic menace.
- We are also collaborating with various technology and engineering companies to explore and evaluate various Carbon Capture Utilisation and Storage (CCUS) options and their applications.

**8. Provide details related to waste management by the entity, in the following format:**

**9. Briefly describe the waste management practices adopted in your establishments. Describe the strategy adopted by your company to reduce usage of hazardous and toxic chemicals in your products and processes and the practices adopted to manage such wastes.**

Circular economy is at the core of JSW Group. At JSW Steel, we follow a 'Zero Waste to Landfill' model to manage our waste. We achieve this with consistent monitoring and optimisation of resource usage, and finding alternative utilities for the waste material we generate. The utilisation of blast furnace slag in JSW Cement operations is a classic example of material circularity which not only reduces the virgin material consumption but also helps in decarbonising another hard to abate sector.

JSW Steel is always at the fore-front of innovation. Slag produced during steel-manufacturing in particular, have historically presented great challenges for the steel industry. As a solution to this, JSW Steel is utilising this slag to manufacture paver blocks which negates need for the extraction of natural sand from river beds. In addition to this, the slag sand project to utilise the granulated blast furnace slag as an alternative to river sand also has wider applications from plain concrete to reinforced concrete and can be used in roads, highways, paver blocks, bricks, plastering and buildings. JSW steel has become the first steel plant in the country to market and sell processed granulated slag or Slag Sand as replacement of river sand. Very recently, JSW Steel has started utilising the plastic waste through injection in Electric Arc Furnace which has led to the replacement of coke fines in the EAF. Thus, time and again, JSW Steel has been innovating to reduce waste generation as well as to increase the waste utilisation.

**10. If the entity has operations/offices in/around ecologically sensitive areas (such as national parks, wildlife sanctuaries, biosphere reserves, wetlands, biodiversity hotspots, forests, coastal regulation zones etc.) where environmental approvals / clearances are required, please specify details in the following format**

All our integrated steel plant facilities are compliant with the environmental regulations.

#### 5. With respect to the ecologically sensitive areas reported at Question 10 of Essential Indicators above, provide details of significant direct & indirect impact of the entity on biodiversity in such areas along-with prevention and remediation activities.

JSW Steel recognises biodiversity as a core focus area. Thus, we are aligned to the National Biodiversity Targets, and take a risk-based approach for making biodiversity a key decision making consideration. We are also committed to not operating in World Heritage areas and IUCN Category I-IV protected areas. Together with the International Union for Conservation of Nature (IUCN), we continue to undertake site-specific assessment of biodiversity impact. We are also a Working Group (WG) and founding member of the India Business and Biodiversity Initiative (IBBI) Chapter of CII-CESD. We were among the firsts to sign up and commit to the Indian Business and Biodiversity Initiative (IBBI), an initiative by the Confederation of Indian Industry (CII) in partnership with India's Ministry of Environment, Forest & Climate Change. In compliance with the IBBI declaration, we have mapped the biodiversity interfaces with business operations designated as biodiversity champion and have implemented schemes for enhancing awareness on biodiversity within the organisation. We also continue our biennial disclosure under the 10 points prescribed by the IBBI.

JSW have taken up a Mangrove restoration project at Dolvi and planted more than a million saplings in the span of 4 years thereby bringing 340 hectares of land under forest cover which is estimated to have carbon capture, over a 25-year period, of approximately 185,000 tonnes. At JSW, it is our goal to achieve 'No net loss' of biodiversity at all our operating sites by 2030.
